- 112 employees in the lower quartile. 105 (93.7%) are female and (6.3%) are male.
- 112 employees in the lower middle quartile. 91 (81.3%) are female and 21 (18.7%) are male.
- 112 employees in the upper middle quartile. 83 (74.1%) are female and 29 (25.9%) are male.
- 114 employees in the upper quartile. 69 (61.6%) are female and 43 (38.4%) are male.

Narrative

The gender pay gap information for the Bay Education Trust as at 31st March 2022 is based upon 448 employees. Of the 448 employees 348 (77.7%) are female and 100 (22.3%) are male.

The employee total (448) is made up of 148 teaching staff and 300 support staff.

Of the 300 support staff 254 (84.7%) are female and 46 (15.3%) are male. The high percentage of females in support staff roles has a significant impact on both the mean gender pay gap figure and the median gender pay gap figure for the Bay Education Trust. This is because support staff roles e.g. Teaching Assistants, Administrators, Caretakers / Cleaners are paid hourly rates below the hourly rates of teaching staff.

Compared to March 2021 the number of males in support staff roles across the Trust increased from 45 to 46 and the number of females in support staff roles decreased from 261 to 254.

Of the 148 teachers 94 (63.5%) are female and 54 (36.5%) are male.

The gender split of staff within the Bay Education Trust reflects the gender split in schools nationally. The Schools Workforce Census in England: November 2019 (published June 2020) shows that 89% of Teaching Assistants and Support Staff in state funded schools (based on headcount) are female. Nearly 76% of teachers are female (based on headcount).

It should be noted that the mean Gender Pay Gap percentage for teaching staff within the Trust is 2.8% and the median Gender Pay Gap for teaching staff is 6.3%.

The mean Gender Pay Gap for support staff is 12.5% and the median Gender Pay Gap for support staff is 3.9%.

The overall mean Gender Pay Gap figure (28.8%) and median Gender Pay Gap figure (51.4%) are directly influenced by the high numbers of female staff in support roles compared to male staff. Both the median and mean figures have decreased since March 2021.

The issue for the Bay Education Trust is not one of equal pay as the Trust continues to pay all teachers on nationally agreed pay rates and it pays support staff in line with pay grades determined by the local authority's Job Evaluation Scheme.

The issue for the Bay Education Trust is the high percentage of female staff employed in support staff roles which are generally lower paid than teaching roles. This is a long-term national issue as evidenced by the School Workforce Census data.

The Bay Education Trust will continue to encourage and support the appointment of female staff into positions at all levels across the organisation. However, to address the ongoing overall mean and median gender pay gaps the Trust will need to seek to better balance the number of males and females in support staff roles across the organisation. The Trust will need to be mindful of the current national split of male / female support staff in schools as it seeks to reduce the gender pay gap. The reality is that while the percentage of females in support staff roles in schools remains so high it is unlikely that the overall gender pay gap figures in the education sector can be closed significantly as they are calculated using mean and median averages.
